¹ Map(s)/Figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where independent upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD form. ⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps Districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.

U.S. ARMY CORPS OF ENGINEERS REGULATORY PROGRAM APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM) NAVIGABLE WATERS PROTECTION RULE

D. Excluded Waters or Features

Excluded waters $((b)(1) - (b)(12))^4$:

Exclusion Name	Exclusion Size	Exclusion ⁵	Rationale for Exclusion Determination
Ditch 1	271 feet	(b)(5) Ditch that is not an (a)(1) or (a)(2) water, and those portions of a ditch constructed in an (a)(4) water that do not satisfy the conditions of (c)(1)	Elm Creek is the nearest potential a(1)-a(3) water, located 0.22 miles west of the AJD review area. Ditch 1, Stormwater Pond 1, and Wetland 1 have no surface water connection to Elm Creek. A review of aerial imagery shows Stormwater Pond 1 and Ditch 1 appear
Stormwater Pond 1	0.02 acres	(b)(10) Stormwater control feature constructed or excavated in upland or in a non-jurisdictional water to convey, treat, infiltrate, or store stormwater runoff	to have been constructed in uplands around approximately 2006. Stormwater Pond 1 and Ditch are therefore not waters of the US (WOUS) under the NWPR. The 2020 Delineation report shows that Wetland 1 is wholly surrounded by uplands and does
Wetland 1	0.14 acres	(b)(1) Non-adjacent wetland	not abut a TNW, lake, pond, or impoundment of a jurisdictional water in a typical year. Wetland 1 does not meet the definition of an adjacent wetland and is not a water of the US (WOUS) under the NWPR.

III. SUPPORTING INFORMATION

- A. Select/enter all resources that were used to aid in this determination and attach data/maps to this document and/or references/citations in the administrative record, as appropriate.
 - _X_ Information submitted by, or on behalf of, the applicant/consultant: 7310 Zanzibar Lane N Wetland Delineation Report by Kjolhaug Environmental Services Company, Inc. (October 20, 2020)

This information (is and is not) sufficient for purposes of this AJD.

Rationale: While the delineation report was sufficient for most of the review, aerial imagery was utilized to determine when Stormwater Pond 1 and Ditch 1 were constructed.
